

The Heart of Our Community

Representatives from the Campbell County Library staff approached *CS* Custom Structures, Inc. to assist them with their programming and design needs for the new Timberlake Community Complex on Leesville Road in Campbell County, Virginia. *CS* Custom Structures, Inc. felt honored to have been approached to assist in such a worthwhile project. When constructed, this project will benefit every citizen in and around the Timberlake area.

There will be a 10,000 sf gymnasium with an elevated jogging track, a coffee shop, an amphitheater, a 14,000 s.f. library and a 14,000 s.f. recreation center housing such potential functions as an art studio, cooking classrooms, craft classrooms, a community room, a dance studio, a fitness center, a teen lounge, a pottery shop, and a mini-theater.

The architectural style was based on traditional values utilizing red brick, decorative columns and a standing seam metal roof. The project is currently in the fund raising phase.
